BRUNING

CORDLESS ELECTRIC ERASER

... the convenient one

Reid 6/2/71

Making erasures was never so easy . . . or so fast as with the new Bruning cordless electric eraser. Weighing only 9-1/2 ounces, this portable unit is just the right tool for draftsmen, architects and engineers everywhere. It not only saves time, but also (1) erases small areas with ease, (2) removes images without harming the paper surface, and (3) does all this with no effort on your part save pushing a button.

So easy to use

The lightweight, compact Bruning cordless operates in either hand. To start, just press the convenient "on-off" switch. Only a light touch to the surface is needed. The high torque speed of the Bruning cordless electric eraser minimizes any chance of damaging the drawing surface while quickly removing the unwanted image — whether pen, pencil or typing.

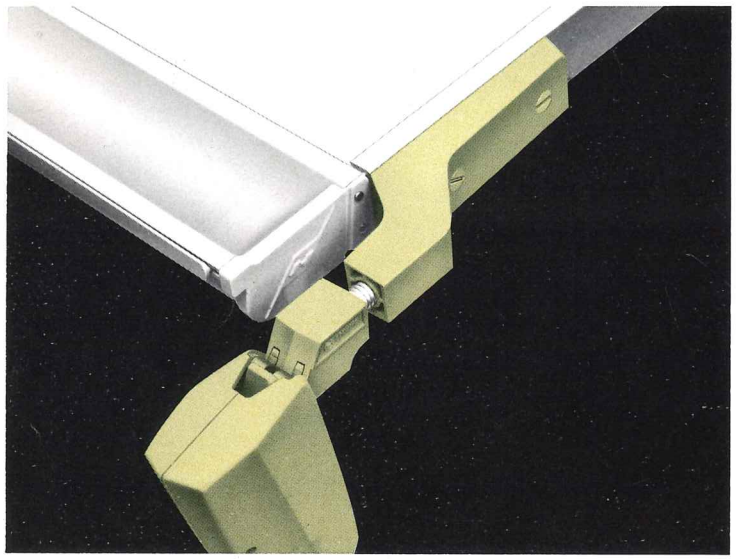
With no cord to worry about, you can take the Bruning electric eraser wherever your work is. To change erasers simply lift up on the locking ring, remove the plug and insert a new one. Six different eraser compositions are offered; each one slated to a particular erasing need.

The Bruning battery-operated eraser sports a clean, modern styling with an attractive pastel green color that blends well with any decor.

Long-term reliability is built-in. And it should be! Bruning has been building erasing machines for years. The tough Cycolac housing is carefully molded to take bumps and falls in stride. Internal components are selected for their consistently dependable performance. The precision high energy motor plus smooth-running, self-lubricating helical gears make it quiet.

Safe, reliable charging system

The compact, lightweight Bruning cordless eraser comes equipped with a versatile mounting stand, which also doubles as the recharging unit. Both board-mount and desk-top models are available. The long-lasting nickel-cadmium batteries give up to 30 minutes of continuous performance per charge. By placing the electric eraser in its convenient stand/recharger when not in use, you're always assured that the batteries stay fully charged.



Hang the combination mounting stand/charging unit on the side of the board, on the bottom, on top . . . anywhere you want. Just twist the adjustable bracket to the direction you want. The eraser fits snugly into the stand and can't be accidentally knocked loose. Or use the optional desk-top charging stand.

The Bruning cordless electric eraser carries an unconditional 90 day guarantee against defects in material and workmanship. No maintenance whatsoever is required.

The new Bruning cordless electric eraser saves time, saves work — and saves you money. For more information, or to see a first-hand demonstration in your office, call your local Bruning sales and service office. They'll be glad to help you in any way.

The new Bruning cordless is just the ticket for secretaries.
